Professional Summary

Motivated and technically skilled professional with a background in software engineering, eager to transition into IT support. Experienced in troubleshooting, system analysis, and workflow automation, with strong knowledge of computing environments, applications, and network fundamentals. Adept at quickly learning new technologies, resolving technical issues, and providing efficient end-user support. Committed to ensuring smooth IT operations and delivering excellent service in fast-paced environments.

Technical Skills

- **Frontend:** HTML5, CSS3, React , Typescript, Tailwind CSS, JavaScript (Vanilla),Responsive Design
- **Backend:** Node.js, Express.js, NEST Js
- **Database:** MongoDB, Mongoose, **PostgreSQL**
- **Tools & Technologies:** Git, GitHub,Trello,Figma
- **Concepts:** CRUD operations, Role-Based Access Control (RBAC), Business Logic Implementation, Inventory Management Systems

---

Professional Experience

Frontend Developer Apprentice

ICPAU (Institute of Certified Public Accountants of Uganda) | *Uganda* | *September – December,2025.*

https://github.com/ICPAU/audit-portal.git

Specialized in frontend development for a comprehensive **AI-powered audit management system** designed for Ugandan Small and Medium Practices (SMPs).

Key Responsibilities & Achievements:

- Engineered a **responsive, dynamic user interface** using **React with TypeScript**, developing distinct **role-based dashboards** for Practicing Accountants, Engagement Partners, Preparers, and QA Reviewers.
- Built and styled **reusable UI components** and complex workflows using **Tailwind CSS and DaisyUI**, customizing features to each role's responsibilities (e.g., evidence preparation, approvals, and quality reviews).
- Focused on delivering an **intuitive user experience (UX)** that streamlined the full audit lifecycle from planning and execution to quality assurance and final review.
- Implemented **state management solutions** to support real-time updates across engagements, ensuring data consistency for all users.
- Practiced **Agile methodologies and Test-Driven Development (TDD)**, actively participating in daily stand-ups, code reviews, and pair programming sessions.
- Containerized the frontend application using **Docker** and supported **CI/CD pipelines** with **GitHub Actions** for smooth integration and deployment.

Technologies: **React JS, Tailwind CSS, Typescript , Visily ,PostgreSQL,Trello,Git**

Project Experience

KGL Management System (Karibu Groceries Ltd)

Full-Stack Developer / Practice Project

https://github.com/sarahangwen/final_project.git

Developed a comprehensive management system for a wholesale produce distributor dealing in cereals with two branches. The system was designed to support daily operations including procurement, sales, credit sales, and inventory tracking.

Key Responsibilities & Achievements:

- Designed and implemented a **role-based system** with three user roles: **Manager, Sales Agent, and Director**, each with specific permissions.
- Built backend APIs using **Node.js and Express.js** to handle procurements, sales, credit sales, and stock updates.
- Implemented **inventory management logic** to ensure stock levels are updated accurately after every procurement and sale.
- Enforced **business rules**, such as restricting sales when stock is insufficient and controlling price determination.

- Developed frontend interfaces using **HTML, CSS, and JavaScript** for data entry, viewing records, and system interaction.
- Integrated **MongoDB** for persistent storage of products, sales records, users, and credit transactions.
- Ensured only authorized users could perform sensitive actions, improving data integrity and system security.
- Collaborated with documentation requirements to align the system with real business workflows.

Technologies Used:
Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, Git

Education & Training

Software Development Training
Refactory (Certificate Program)

Strengths & Attributes

- Strong willingness to learn and adapt to new technologies
- Good problem-solving and debugging skills
- Ability to understand and implement business requirements
- Team-oriented with clear communication skills
- Detail-focused with an emphasis on data accuracy

Career Objective

To secure an entry-level role in software development or IT support where I can apply my technical skills, grow professionally, and contribute to building efficient and reliable systems.
